

Examiner-Initiated Interview Summary	Application No.	Applicant(s)	
	09/161,680	BORNSCHEUER ET AL.	
	Examiner	Art Unit	
	David J. Steadman	1656	

All Participants:

Status of Application: Pending-rejected

(1) David J. Steadman.

(3) _____

(2) Jason W. Bryan.

(4) _____

Date of Interview: 5 February 2007

Time: _____

Type of Interview:

- ☒ Telephonic
☐ Video Conference
☐ Personal (Copy given to: ☐ Applicant ☐ Applicant's representative)

Exhibit Shown or Demonstrated: ☐ Yes ☒ No
If Yes, provide a brief description:

Part I.

Rejection(s) discussed:

Claims discussed:

Prior art documents discussed:

Part II.
SUBSTANCE OF INTERVIEW DESCRIBING THE GENERAL NATURE OF WHAT WAS DISCUSSED:

The examiner noted that three (3) pages of the response filed on 9/25/06 were compressed into a single page and requested a FAX of these pages for entry into the application file.

Part III.

- ☐ It is not necessary for applicant to provide a separate record of the substance of the interview, since the interview directly resulted in the allowance of the application. The examiner will provide a written summary of the substance of the interview in the Notice of Allowability.
☒ It is not necessary for applicant to provide a separate record of the substance of the interview, since the interview did not result in resolution of all issues. A brief summary by the examiner appears in Part II above.

(Examiner/SPE Signature)

(Applicant/Applicant's Representative Signature – if appropriate)

Under the American Revolution Act of 1992, no fee is required to request a PTO Extension of Time under 37 CFR 1.130(e).

PETITION FOR EXTENSION OF TIME UNDER 37 CFR 1.130(e)

Application Number: **09/161,680** Date: **September 28, 1998**

For: **THE GENERATION OF NEW CATALYTIC ACTIVITIES IN ENZYMES**

An Unit: **1656** Examiner: **STADMAN, DAVID J**

This is a request under the provisions of 37 CFR 1.130(e) to extend the period for filing a reply in the above identified application.

The requested extension and fee are as follows (check time period desired and enter the appropriate fee below):

Time Period	Fee	Small Entity Fee
<input checked="" type="checkbox"/> One month (37 CFR 1.17(a)(1))	\$50	\$125.00
<input type="checkbox"/> Two months (37 CFR 1.17(a)(2))	\$100	\$250.00
<input type="checkbox"/> Three months (37 CFR 1.17(a)(3))	\$150	\$375.00
<input type="checkbox"/> Four months (37 CFR 1.17(a)(4))	\$200	\$500.00
<input type="checkbox"/> Five months (37 CFR 1.17(a)(5))	\$250	\$625.00

Additional claims shall enter status, 37 CFR 1.17.

A check in the amount of the fee is enclosed.

Payment by credit card, Form PTO-3030 is attached.

The Director has already been authorized to charge fees in this application to a Deposit Account.

The Director is hereby authorized to charge any fee which may be required, or credit any overpayment, to Deposit Account Number **33,750**.

WARNING: Information on this form may become public. Credit card information should not be included on this form.

I am the: ☐ applicant/inventor ☒ assignee of record of the entire interest, 37 CFR 3.71 ☐ attorney or agent of record, Registration Number **31,503** ☐ attorney or agent under 37 CFR 1.34

Signature: **Jason W. Bryan** Date: **9/28/98**

Typed or Printed Name: **Jason W. Bryan** Telephone Number: **202-650-0100**

NOTE: Extension of time under 37 CFR 1.130(e) is only available if the application is in compliance with the provisions of 37 CFR 1.130(e) and the fee is paid. Extension of time under 37 CFR 1.130(e) is not available if the application is in compliance with the provisions of 37 CFR 1.130(e) and the fee is not paid.

REPLY TO NOTICE NON-COMPLIANT AMENDMENT

Sir,

In response to the notice of non-compliant amendment, Applicants submit the marked version of the substitute specification. Applicants respectfully note that only the corrected section of the non-compliant amendment need be submitted in compliance with 37 CFR 1.121. Applicants also submit with this reply Davis and Waldmann, *Enzyme Catalysis in Organic Synthesis*, Wiley-VCH Verlag GmbH, Weinheim version 1995 and 2002 as requested by the Examiner.

REQUEST FOR EXTENSION OF TIME

It is respectfully requested that a one month extension of time be granted in this case and charged to deposit Account No. 14,147. Please charge any shortage in fees to the same account and please credit any excess fees to such deposit account.

Respectfully submitted,

AMENDMENTS TO THE SPECIFICATION (marked version)

The generation of new catalytic activities in enzymes alteration of the substrate specificity of enzymes

The invention relates to a method for generating new catalytic activities altering the substrate specificity of enzymes.

The synthetic chemist is frequently confronted by the problem in practice that he is unable to follow synthetic routes which are easy and simple to carry out to prepare a chemical compound because these routes would result in compounds in which, for example, the elimination of a required protective group is no longer possible because, otherwise, the synthesized molecule would be destroyed. To solve this problem he frequently has to follow a more complicated and time-consuming synthetic route.

Enzymes cleave chemical bonds under mild conditions. They can therefore sometimes be used to solve synthetic problems of this type, i.e. a protective group can, for example, be eliminated enzymatically under mild conditions without destroying other bonds and thus the molecule. Enzymes thus make it possible to obtain the required substances easily and quickly in the laboratory. Moreover, the enzymatic activity and/or stability is often inadequate for industrial use of the enzymes, so that although the chemical syntheses require a larger number of synthetic stages, nevertheless they are less costly and are therefore implemented industrially.

This is why a large number of studies have been carried out on improving the enzymatic activity and/or stability. Various routes have been followed for this.

It is possible by site directed mutagenesis to achieve very specific improvements in the stability and/or enzymatic activity of enzymes. The disadvantages of site directed mutagenesis of enzymes is that this method requires the availability of a large amount of knowledge about the structure and function of the enzymes from X-ray structural analyses, from modeling, and from comparisons with other enzymes of the same or similar specificity. In addition, the sequence of
